Career Summary

Aspiring Developer/Designer seeking to build things with computers. My central focus has always been on design and front-end UI/UX, but I've recently become heavily involved in back-end tools for the purpose of extending my knowledge.

I view technology as an extension of the human mind, and use it in that way. I like to learn about tech and its limitless potential to create things that don't yet exist.

Academic History

SeedPaths (Denver, CO) 8-Week Intensive Software Development Training <ul style="list-style-type: none">Certified Scrum Master	2015
